## TECHNICAL PORTFOLIO

GitHub Portfolio: <https://karinalaura.github.io/>

---

## PROFESSIONAL PROFILE

Business Systems Analyst and Application Developer with over twelve years of enterprise HRIS, systems analysis, and data engineering experience within the Trinidad and Tobago Police Service.

Officially appointed as Business Process Officer for the Oracle Fusion Cloud ERP implementation, collaborating with Oracle consultants to analyse business processes, define functional requirements and translate Police Service legislation into enterprise system configuration.

Experienced in designing Python-based business applications, automating workflows, developing ETL solutions and delivering enterprise projects from requirements analysis through implementation and user adoption. Proven ability to bridge business and technical teams while delivering practical technology solutions that improve organisational efficiency.

---

## CORE COMPETENCIES

**Business Analysis:** Requirements Gathering, Process Mapping, Functional Specifications, Business Process Re-engineering, Stakeholder Engagement

**Software Development:** Python, Django, Flask, SQL, ETL, Workflow Automation

**Enterprise Systems:** Oracle Fusion Cloud ERP, iHRIS, Employee Self-Service (ESS)

**Data & Analytics:** Data Cleansing, Data Migration, Dashboard Development, Reporting, Workforce Analytics

**Project Delivery:** Project Management, Systems Implementation, Change Management, Digital Transformation

---

## PROFESSIONAL EXPERIENCE

Trinidad and Tobago Police Service

Nov 2019 – Present

### Business Operations Coordinator – Human Resource Information Systems (iHRIS)

Provide enterprise HRIS support, business systems analysis, software development and data analytics supporting digital transformation initiatives across the Trinidad and Tobago Police Service.

### Key Achievements

- Support enterprise HRIS operations serving approximately 8,000 employees, maintaining data integrity while collaborating with internal departments and external government stakeholders.
- Designed, developed and continue to support multiple Python-based business applications, including the Job Letter Application, payroll ETL solution, Attendance/Occupancy Tracker, Ticket Management System and reporting utilities, ensuring ongoing data integrity, operational reliability and continuous improvement.

- Perform business process analysis, requirements gathering and workflow design to improve organisational efficiency.
- Conduct enterprise data extraction, cleansing, migration and reporting supporting strategic decision-making.
- Develop retirement forecasting dashboards and workforce analytics supporting organisational planning.
- Present technical solutions to senior management and stakeholders, explaining application architecture, business logic and implementation strategies.
- Delivered critical data in support of TTPS audit on Contracted Officers by the Ministry of Finance

## SELECTED ENTERPRISE INITIATIVES

### Oracle Fusion Cloud ERP Implementation

Jun 2024– Sep 2025

#### Business Process Officer

- Represented TTPS during Oracle Fusion implementation.
- Analysed Police Service Regulations, Civil Service legislation and business processes to define functional requirements.
- Developed process maps, Foundation Design documentation, business rules and logical workflows.
- Collaborated directly with Oracle consultants on configuration and police-specific business logic.
- Collaborated with Inspector Administration to map organizational hierarchies and 'Span of Control' approval paths across nationwide stations to configure the Oracle DBMS architecture.
- Executed extensive enterprise data cleansing, extraction, and validation across legacy iHRIS records to standardize personnel schemas for Oracle Cloud ERP staging and migration readiness.
- Designed a Python Leave Balance Calculator supporting migration planning.
- Participated in User Acceptance Testing (UAT) and live functional walkthroughs, collaborating directly with Oracle programmers to test modules, identify system gaps, and refine configurations in real time.

### Employee Self-Service (ESS) & ACH Rollout

2022

#### Project Manager

- Appointed by the Head of Finance to coordinate organisation-wide implementation.
- Developed user communication materials, intranet resources and training initiatives.
- Coordinated stakeholder engagement and adoption activities across TTPS.

## SELECTED SOFTWARE DEVELOPMENT PROJECTS

- **Leave Balance Calculator** – Developed a Python application supporting Oracle Fusion migration by automating complex leave calculations.
- **Job Letter Application** – Automated employment verification letters with integrated payroll ETL, electronic signatures and architecture supporting future QR code verification and ESS integration.
- **Attendance Accountability System** – Designed attendance and building occupancy tracking solutions using Google Apps Script and Python.
- **One Stop Hub Ticket Management System** – Designed workflow and commenced Phase 1 Python development to manage HR and Finance queries.
- **Retirement Management & Transition Tracking System** – Proposed enterprise solution for retirement lifecycle management with role-based access and workflow automation.
- **Payroll ETL Application** – Developed a Flask application to extract, validate and integrate payroll data from PDF payslips into operational system.
- **PDF to Excel Conversion Utility** – Automated conversion of Versonnel PDF reports into Excel for reporting and analysis.
- **Retirement Forecast Dashboard** – Developed workforce analytics dashboards supporting retirement planning and decision-making.

Police Administration

Nov 2017 - Nov 2019

### **Business Operations Assistant II**

- Supervised IHRIS clerks managing 8,000+ employee records with 99% accuracy.
- Maintained HR data integrity for 300 First Division Officers and 600 Contracted Officers.
- Provided administrative support to the Director of Human Resources.

Police Administration

Oct 2005 - Nov 2017

### **Police Administration | Business Operations Assistant I | IHRIS Data Transaction Clerk**

- Maintained personnel data for 8,000+ Police Officers, Public Officers, and Contract Staff.
- Produced standard HR reports and assisted in the preparation of budget estimates.
- Handled clerical and data maintenance duties with emphasis on accuracy and compliance.

TSTT, Safety & Health Department

Mar 2005 - Oct 2005

### **OJT Clerk**

- Peoplesoft data entry and all other relevant clerical duties.

---

## **TECHNICAL SKILLS**

Programming: Python, Google Apps Script

Frameworks: Django, Flask

Databases: SQLite, MySQL

Enterprise Systems: Oracle Fusion ERP, iHRIS, ESS

Analysis: Business Process Analysis, Requirements Gathering, Process Mapping

Data: ETL, Data Cleansing, Dashboard Development, Reporting

---

## **EDUCATION**

### **B.Sc. (Hons) Computer Science (First Class Honors)**

- University of Hertfordshire

### **Level 6 Diploma in Business Information Systems (Bachelor's Equivalent)**

- ABE (UK)

### **St. Augustine Girls' High School**

---

## **CERTIFICATIONS**

- Google Data Analytics Professional Certificate
- Python
- Tableau Specialization
- Power BI
- Cybersecurity

---

## **PROFESSIONAL TRAINING**

### **PeopleSoft IHRIS Training:**

- Workforce Administration, Labor and Industrial Relations, Absence Management, Performance Management, Query Reporting

### **Performance Management and Increments Training**

### **Customer Service Training**
